

Worksheet: Does it use AI?

Names: _____

Date: _____

- Step 1: In pairs, discuss whether you think the following technologies use AI.
- Step 2: Work together to choose from a scale of 1 to 5 – mark down 1 if you are not sure and 5 if you are very sure.
- Step 3: Write down your answers to the questions.

Remember, there are often no right or wrong answers.

Step 1	Step 2	Step 3
Technology	How certain are you that the technology uses AI?	If you think AI is used in the technology, how does it make the technology more useful?
Chatbot	4	Using AI means the chatbot gives a more detailed answer to a question.
Fitness tracker		
Pocket calculator		
Washing machine		
Music streaming service		
Mobile phone camera		
Gaming console		

Extend:

In pairs, discuss the following questions and write down your answers:

1. How does AI generally make technology more useful?

2. Think of a technology which does not use AI. If AI was used in that technology, would that make the technology better? If so, how?

3. What technologies will never need to use AI and why?
